Call +44 55 92 00 for more information. Regulated by the Danish Financial Supervisory Authority (in Danish: Finanstilsynet)

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type: Alternative Investment Fund.

Objectives: The investment objective of the Sub-fund is to offer attractive long term returns by investing in a portfolio of unlisted infrastructure funds.

The Sub-fund expects to commit to four to six infrastructure funds, mainly investing inter alia, in existing Brownfield and Greenfield infrastructure assets and to co-invest alongside such underlying infrastructure funds in existing Brownfield and Greenfield infrastructure assets. The Sub-fund is expected to invest alongside each such underlying infrastructure fund in about ten to fifteen infrastructure assets within energy, utilities, transport, telecom and other infrastructure assets.

The Sub-fund will focus on underlying funds that target “Core Plus” and “Value Add” strategies with an active management and assets with high barriers to entry and stable cash flows.

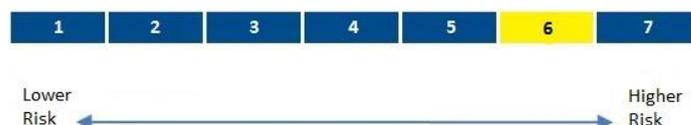

The Sub-fund may also hold transferable securities listed on a stock exchange or traded on another regulated market, money market instruments, other undertakings for collective investment, cash and/or cash equivalents, pending investment or reinvestment, for cash management purposes or for any other purpose that the Investment Manager considers appropriate for the Sub-fund.

Intended Retail Investor: The intended consumer of this product will have a deep investment knowledge.

Product term: 30/06/2034 (The Term may be extended by the Board of Directors for up to 3 successive one-year periods).

What are the risks & what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The risk indicator assumes you keep the product minimum 15 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You can cash in early. You may not be able to sell or end your product easily or you may have to sell or end at a price that significant impacts on how much you get back.

We have classified this product as 6 out of 7 which is the second highest risk class. Category 1 is not a risk-free investment.

The capital of this Fund is not guaranteed. The fund is invested in financial markets and uses techniques and instruments which are subject some level of variation which, may result in gains or losses.

The investors will be exposed to following principal risks:

Liquidity Risk: The Sub-fund invests in a number of underlying fund that invests in infrastructure assets. Infrastructure assets may be considered highly illiquid. Liquidity risks in infrastructure assets may be due to the size of some assets, the limited num-

ber of potential buyers and regulatory approval requirements means that divestments of infrastructure assets can take a significant amount of time and effort.

Sector risk: For sub-funds investing in a single sector, there is a risk that general economic factors or specific market conditions pertaining to that industry will affect the value of the sub-funds investments.

Foreign exchange risk: Investment in foreign securities entails a risk when exchanging foreign currencies for DKK, as exchange rates may fluctuate. Such fluctuations may affect the value of a sub-funds investments in foreign securities, positively or negatively. Sub-funds investing in Danish securities incur no direct foreign exchange risk, whereas sub-funds investing in European securities incur limited foreign exchange risk. Sub-funds that hedge their positions vis-à-vis the DKK incur very limited foreign exchange risk. The description of the investment area of each sub-fund includes information on any hedging.

Risks materially relevant to the ordinary shares that are not included in the summary risk indicator include political risk, technical risk and valuation risk.

For further details about the principal risks of the fund, please refer to the following “General risk factors”-section and “Specific risks”-section in the Prospectus of the Sub-fund.

This product does not include any protection from future market performance so you could lose some or all of your investment. Investors in the Fund are liable only for their investments.

Performance Scenarios

Investment = € 250.000

Scenarios	1 Year*	3 Years*	5 Years*
Stressed Scenario What you might get back after costs Average return each year %			
Unfavorable Scenario What you might get back after costs Average return each year %			
Moderate Scenario What you might get back after costs Average return each year %			
Favorable Scenario What you might get back after costs Average return each year %			

***Important:** Minimum holding period is 15 years. There are no relevant benchmark or reference. Due to that fact, it is not possible to calculate performance scenarios.

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest EUR 250.000.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

It is not possible to cash in this product easily. This means it is difficult to estimate how much you would get back if you cash in before the end of the recommended holding period. Either you will be unable to cash in early or you will have to pay high costs or make a large loss if you do so. For further details, please refer to the Prospectus of the Sub-fund.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if The Fund is unable to pay out?

The Fund is not required to make any payment to you in respect of your investment. If the Fund was liquidated, you would be entitled to receive a distribution equal to your share of the Company's assets, after payment of all of its creditors. There is no compensation or guarantee scheme in place that applies to the Fund and, if you invest in the Fund, you should be prepared to assume the risk that you could lose all of your investment.

What are the costs?

This table shows the impact the different types of costs have on the investment return you might get back at the recommended holding period and what the different cost categories mean.
